

Just a *Click Away* from Convenient Access

Wyoming Valley Sanitary Authority reminds residents that convenient access to **customer payment locations**, **municipal updates**, and **advance publication** of the Authority's Board Meeting agendas remain accessible in the **Red Alert** section of our homepage at wvsa.org.

As Children Can Attest ... Our Environment Needs Our Help

Outside and surrounded by nature, many children become **innate scientists**, seemingly propelled to **explore** and **experience** our natural environment. And, many of them do so with relish — basking in the sights, sounds and scents of the outdoors.

Our natural environment provides copious opportunities for **discovery**, **inquisition**, and **conversant problem solving**. Many children are also quite receptive to learning about stormwater management, often sharing their perspectives on how we can **protect our local waterways** and **improve the environment**.

Wyoming Valley Sanitary Authority's Stormwater Management Division plays a vital role, too, hosting **outdoor educational events** and **challenging inquisitive minds** to share suggestions and solutions that may foment a better environment and futuristic climate.

To see an example of this, **scan the code** and view a recently produced public outreach and education video. This video and others are funded via the stormwater management fee, which continually supports our local municipalities' ability to meet **governing stormwater mandates**.

Illegal Dumping: If You've Seen it, Please *Report It*

Have you seen **illegal dumping** into our local waterways or pollution discharge to our streams and creeks? To report these issues, please contact our Stormwater Management Division at **570-825-9483** or visit our website at wvsa.org/stormwater-management (Report Illicit Discharges), where you can submit a form and attach related images.

Let It Snow...

The Clean Way!

Wyoming Valley Sanitary Authority's (WVSA) Stormwater Management Division reminds residents about the importance of **properly managing melting snow on surfaces**. Stormwater runoff comes in many forms, including thawing snow that can easily infiltrate into local storm drains while carrying pollutants and high volumes of water into nearby streams, our river, and other waterways.

Letting it snow the clean way calls for **piling snow** onto areas providing the most opportunity for **ground infiltration** and where water doesn't pond, such as lawns. Also, an **early sweep or shoveling** of dry, powdery snow will help prevent the need for an abundance of deicers containing chloride that could be **toxic** to wildlife and plants.

Residents are also encouraged to **avoid piling snow on top of storm drains** or near water bodies and to clear any snow that may have landed onto neighboring drains. For more information on stormwater management and best practices for residents, visit wvsa.org/stormwater-management.

Questions

about **Services** or **Billing?**

Our representatives are available **Monday - Friday**,
8AM - 4PM (Sanitary - 570-820-9872) and
7AM - 3PM (Stormwater - 570-825-3416).

You can also send us an email at info@wvsa.net.

UPCOMING EVENTS

WVSA Board of Directors Meetings 2023

Tuesday, January 17

Tuesday, February 21

Tuesday, March 21

Dates subject to change.
